Current Status

- 20 successful assessment visits (C5RAs, HMERAs, TSRAs) on PACFLT surface ships and submarines since September '03.

- Replaced PVAT and Common 5 for C5RA & HMERA visit management, 2-Kilo generation, EOC calcs and TSP model input.

- Dozens of features added to streamline data input, filter SCLSIS data and validate CSMP data.

Current Status
(Continued)

- Approved as a Legacy Application for NMCI
  - Anticipate Interim Authority To Operate in June '04
- CNSL-requested software changes to replace Common V are complete and 50% of LANT-unique reports are done.
- Equipment Lists and Standard Statements features are complete and undergoing testing.
- PRISMS Visit Mgt module is 90% complete.
  - Ancillary modules will take another month. Will complete before NMCI IATO.
